PROFESSIONAL SUMMARY

Software Engineer with 5+ years of experience specializing in building responsive, scalable, and high-performance web applications using Next.js, JavaScript, and TypeScript. Proven track record in both product-driven microfinance and agile software house environments. Strong expertise in frontend optimization, Cross-Browser Compatibility, and comprehensive unit testing using Jest. Adept at implementing full-stack JavaScript architectures with Node.js, integrating tracking systems, leveraging AI-assisted development workflows, and collaborating within Agile/Scrum teams to deliver robust digital solutions.

WORK EXPERIENCE

Amartha Microfinance

August 2021 – Present

Software Engineer

South Jakarta, Indonesia (Hybrid)

- Maintained and optimized the core P2P lending marketplace application using Next.js, improving UI performance, frontend stability, and core web vitals.
- Formulated and executed comprehensive unit tests using Jest, achieving an 80% code coverage threshold to minimize regression issues and enhance application reliability.
- Spearheaded the migration of marketplace modules into a hybrid WebView-based platform, building seamless JavaScript bridges to enable robust frontend and mobile app collaboration.
- Integrated CleverTap tracking systems to capture user behavior data, allowing product teams to analyze user journeys and optimize engagement.
- Leveraged cutting-edge AI-assisted development tools to streamline coding workflows, accelerating feature delivery and sprint velocity.
- Authored and maintained comprehensive technical documentation in Confluence, standardizing onboarding guides, architecture patterns, and API contracts for engineering teams.
- Built and refactored the critical KYC (Know Your Customer) verification workflow using WebView, incorporating secure REST API integration for real-time identity validation.
- Supported the Loan Engineering team by optimizing core loan services within the internal dashboard, focusing on error handling, state management, and data integrity.
- Collaborated with Backend, QA, and Product managers in an Agile/Scrum environment, participating in rigorous peer code reviews to enforce clean code architecture.

TwisCode

May 2020 – August 2021

Front-End Developer

Surabaya, Indonesia (Remote/On-site)

- Developed and delivered multiple concurrent client projects in a high-velocity software house environment, successfully adapting to rapid shifts in system requirements.
- Engineered responsive and modular admin dashboards using Next.js and React, integrating secure authentication and complex data tables.
- Built and customized professional client landing pages using WordPress and Elementor, optimizing page speed, SEO structures, and responsive layouts.
- Collaborated closely with UI/UX designers and Backend engineers to ensure pixel-perfect implementation and seamless API integration under tight production deadlines.

TECHNICAL SKILLS

Frontend Languages & Frameworks: HTML5, CSS3, JavaScript (ES6+), TypeScript, Next.js, React, WebView, WordPress, Elementor, Figma

Backend & Databases: Node.js, Express.js, Golang, REST API, MongoDB, MySQL

Tools, DevOps & Testing: Git, GitHub, Docker, Jest, CleverTap, Confluence, Jira, Postman, AI-Assisted Dev Tools, Agile/Scrum

BOOTCAMPS & CERTIFICATIONS

Alterra Academy

July 2021 – August 2021

Back End Golang Developer Intensive Bootcamp

Indonesia

PT. DumbWays Indonesia Teknologi

February 2020 – May 2020

Full Stack Developer JavaScript Intensive Bootcamp

Indonesia

EDUCATION

Universitas Mikroskil

January 2016 – November 2019

Diploma Degree (D3) in Management Informatika

Medan, Indonesia
